FEDERAL ENERGY
REGULATORY COMMISSION

It has come to my attention that a proposed Liquefied Gas Facility endangers our Long Island Sound. I'm against this proposal and urgently ask that this proposal be denied.

My nine year old daughter was devastated to hear of this proposal. She wishes to become a Marine Biologist and immediately new that this LNG would effect Marine Life. If a nine year old can recognize the severity of what this pipeline has on Marine Life alone, why can't our government?

This Liquefied Natural Gas Facility endangers Marine Life, Air Quality, and limits public access and sets a dangerous precedent of industrializing the Sound. Please do not allow this proposal to be approved, for our sake and our future Marine Biologists.
